

## **Green Growth and Energy Transformation Expert Review Meet**

CUTS International, with the support of Friedrich Ebert Stiftung India, is currently facilitating a project of Green Growth and Energy Transformation at subnational level. For this purpose, seed communities of experts and practitioners have been set up to formulate an implementable strategy. So far in the course of consultations many issues meriting attention have come up. Amongst them is also the role of Decentralised Renewable Energy (DRE) in evolving Energy Landscape particularly focusing on Microgrids/advanced Microgrids.

In this light, a dialogue on grid integration of Utility Distribution Microgrids, with a focus on challenges and opportunities is being organised in New Delhi on Wednesday 27<sup>th</sup> September 2017. Other than this, the discussion will also entail presentation of key policy challenges that have been documented from field analysis in Rajasthan and West Bengal.

**Date: Wednesday 27<sup>th</sup> September, 2017 | Venue: Le Méridien, Windsor Place, New Delhi- 110001**
