# INTERNATIONAL CONFERENCE ON COMPETITION AND DEVELOPMENT

MULTI PURPOSE HALL, INDIA INTERNATIONAL CENTRE, NEW DELHI

## HOW CAN COMPETITION POLICY PROMOTE INCLUSIVE GROWTH?

'Development' can be visualised as increasing the size of the cake (growth) and simultaneously ensuring equitable distribution of the cake (equity). Having 'growth' as the prime policy goal, and leaving 'equity' and 'inclusiveness' to the 'trickle down' phenomenon, although can yield better growth indicators, but can also lead to increasing economic inequality.

An inclusive approach that ensures 'equality of opportunity' and 'fair access' could increase the base of contributors of 'growth', consequently decreasing the base of people dependent on 'redistribution'. Competition law/policy can play a more active role here. While competition policy reform can promote 'equality of opportunity', effective enforcement of competition law can tackle market failures and help maintenance of 'robust and fair markets'.

### Confirmed Speakers, amongst others:

### Agenda
