The SDG Digital Day, an initiative by the International Telecommunication Union, seeks to prioritise data and digital technologies to stimulate increased efforts across all the 17 SDG goals. India's Digital Public Infrastructure (DPI) is a success story that can be duplicated to assist other nations in attaining their national priorities and the SDGs. Indian Prime Minister Narendra Modi said at the G20 Digital Economy Ministers Meet that the DPI is a "scalable, secure and inclusive solution for global challenges." As a celebration of SDG Digital Day, CUTS is organising a virtual two-hour moderated and interactive panel discussion on "Reimagining India's Digital Public Infrastructure (DPI) globally for attaining the SDGs".

NAVNEET SHARMA
DG, CUTS Institute for Regulation & Competition (CIRC)
