 Sciences and Professor, Economics, Shiv
 Nadar University India

Cyber and critical technologies have assumed high geopolitical importance, which is increasingly influencing international trade and investments. India and Australia strategically came closer and signed a Comprehensive Strategic Partnership in June 2020 aiming to deepen bilateral cooperation in cyberspace.

Under this backdrop, the conference is being organised by CUTS along with Australian Risk Policy Institute (ARPI) and International Institute of Information Technology, Bangalore (IIITB) under the project "Ethical 6G: Identifying Elements of Ethical Framework for 6G and Creating Opportunities for India and Australia". The project is supported by the Department of Foreign Affairs and Trade (DFAT), Australia under Australia-India Cyber and Critical Technology Partnership (AICCTP) grant which aims to contribute towards an open, secure, free, accessible, stable, peaceful, and interoperable cyberspace.
